

InfraScience Selected For Microsoft Infrastructure Partner Advisory Council

Taking Partnership to a New Level Opens up Opportunities for Information Exchange

Alpharetta, GA - (January 9, 2007) - InfraScience announced today that Jeff Meyer, Principal Partner, was accepted into the Microsoft Infrastructure Partner Advisory Council (IPAC). Microsoft developed the IPAC as an invitation-only advisory council to gather and disseminate top partner feedback on infrastructure solutions and initiatives. Through meetings and ongoing dialog, council members will provide Microsoft teams and executives feedback on products, services, training, marketing, and programs. This feedback will drive core integration between Microsoft and their partners to deliver initiatives that fit the needs of their partners and customers.

"We are honored to accept an invitation to serve in the Microsoft Partner Advisory Council. This is a great opportunity to work with Microsoft executives and a select group of leading partners from around the world to provide feedback and gain insight on infrastructure solutions," Jeff Meyer, Principal Partner, InfraScience said. "This recognition will give us the opportunity to influence marketing programs and product strategies. We will serve as a conduit for information between our clients and Microsoft to ensure that our clients' needs are addressed. ."

Partner Advisory Councils are limited to 20-25 partner members worldwide and are companies that are Gold Certified and were nominated by Microsoft partner account managers or product teams. Selection is determined from a number of criteria including submittal of case studies, technical competencies, participation in marketing campaigns and a focus on leading technologies. The Council conducts quarterly meetings with Microsoft executives in management, product and services groups to gain feedback and enhance vision in many areas of the company.

About InfraScience:

Based in Alpharetta, Georgia, InfraScience, LLC provides consulting services for mid-market and Fortune 1000 clients desiring expert guidance on technology infrastructure initiatives.
