

InfraScience Recognized as Microsoft Security Solutions Competency Partner

Microsoft Security Competency Highlights InfraScience's Expertise in Designing and Deploying Security Solutions

Alpharetta, GA - (December 1, 2007) - InfraScience announced today the completion of the Microsoft Security Solutions Competency program. Now, as a Microsoft Gold Certified Partner with a Security competency, InfraScience's credentials validate its expertise in Microsoft security solutions. This recognition ensures businesses that InfraScience understands change management, change control, risk assessment, and the impact that these and other security-related processes have on a business's overall security policy. InfraScience possesses certified experience and customer referenced expertise in Microsoft Forefront, Microsoft Internet Security and Acceleration Server, and Microsoft Intelligent Application Gateway. The Infrastructure Security specialization corroborates InfraScience's ability to enhance the security of Microsoft platforms and IT infrastructures.

"With security as a top IT priority for many businesses, we wanted to partner with Microsoft to offer our clients the best security solution," Jeff Meyer, Principal Partner, InfraScience said. "This competency gives us the advantage of continuous Microsoft research and updates so that we can mitigate risks for our clients. We are pleased to be a select Microsoft Security Solutions Competency Partner."

To become a Security Solutions Competency partner, an organization must meet stringent requirements that prove an understanding of the basic and advanced concepts of securing an IT infrastructure. The partner must also have individuals on its team who have industry certifications like the ISACA and (ISC)² certifications, both of which are well-respected by CSOs and security professionals around the world. Partners in the Security Solutions Competency also:

- Have proven expertise in deploying and managing Microsoft security products in the context of a customer's security policy.
- Understand the impact that their work has on the security of a customer's IT infrastructure.
- Ensure that their work represents the full scope of the industry knowledge that comes with their Microsoft and security industry certifications.

About InfraScience:

Based in Alpharetta, Georgia, InfraScience, LLC provides consulting services for mid-market and Fortune 1000 clients desiring expert guidance on technology infrastructure initiatives. The firm, a Microsoft Gold Certified Partner, helps organizations maximize their return on infrastructure investments.
